

**MASTON**

**WISE  
TINT**

# 2-COMPONENT TINTING SOLUTION

IN ONE CAN – ALWAYS READY TO USE

**THOUSANDS OF COLORS**

**HIGH STOCK ROTATION**

**LOW INVESTMENT**

**FAST AND ACCURATE**

**LONG POTLIFE**

# 2K Tinting Solution

**2K TINTING SOLUTION** is the quickest and easiest way to tint and pack custom colours in 2K cans. The solution supports RAL and NCS colour standards and much more.

## How does Wise 2K<sup>©</sup> work?

● PROPELLANT

● 2K RESIN

● DE-ACTIVATED HARDENER

● 2K REACTION

WISE 2K™ technology licensed by Wisespray International Ltd. [www.wisespray.com](http://www.wisespray.com). International patents pending. Two component spray paint. One compartment can. Unlimited Potlife. WISE 2K™ is a trademark or registered trademark of Wisespray International Ltd.

# 1. The online software [www.2kmix.com](http://www.2kmix.com)

**EASY TO USE.** The colors are easy to identify and the formulas are shown as absolute or accumulative weights in grams. If the individual paste amount is not high enough for accurate tinting, the software advises how many cans should be filled for color accuracy. For serial filling of the same color, simply select the amount of cans to be filled and mix the desired amount in one go.

---

# 2. Fast, easy & accurate

**THE COLOR RETRIEVAL** solution works with ready-to-mix colorants. The formulas are designed for the optimal ratio of resin and hardener.

The tint bases are available in matt, semi-gloss and high gloss. The tint base contains 2K binder, hardener, solvents, additives and propellant.

---

# 3. Filling

**USE ANY SPRAY PAINT** filling machine. We recommend eFill®, the only electric, serial filling capable spray paint filling machine.

---

# 4. Long potlife

**WORLD'S FIRST LONG POTLIFE** 2-component custom spray paint lets the customer enjoy full value from the can. Since the reaction of the resin and hardener takes place when sprayed out into the atmospheric pressure, the customer can save leftover paint for later use.

# Technical information

## Tint base

**CAN VOLUME:** 400ml / 11oz  
**TINT BASE VOLUME:** 300ml / 10oz  
**COLORANT VOLUME:**  
95ml +/- 5% depending  
on the color  
**RESIN TYPE:**  
2-component epoxy  
**RECOMMENDED  
FILM THICKNESS:** one and  
a half cross coats, 40 microns  
**DUST DRY:** 45 min  
**TOUCH DRY:** 3-5 hours

**SURFACE HARDNESS:** 12 hours  
**RAIN RESISTANT:** 12 hours  
**PETROL RESISTANT:** 8-10 days  
**FINAL HARDNESS:** 8-10 days  
**POT LIFE:** 36 months  
**POT LIFE TINTED CAN:**  
3 months

*Test the compatibility before  
applying on any 1-component  
paint layer.*

## Tinting pastes

**VOLUME:** 1 liter / 33oz  
**RESIN TYPE:**  
2-component epoxy  
**CLEANING OF RESIDUES:**  
acetone and cloth  
**AMOUNT OF PASTES:** 15  
**POT LIFE:** 12 months

*Before tinting shake upside  
down for at least 30 seconds.  
Close the lid after tinting to  
avoid evaporation.  
Avoid contact with water.*
